- **Seven login options are available**
- **Authenticated access uses codes that are generated and managed on the unit**
- **A firewall protects the business network from hackers with PCI DSS compliance**
- **Master bandwidth control, and individual bandwidth settings for each code**
- **Content filtering is available to ensure a family friendly Internet service**
- **Monitor Internet utilization through comprehensive reports**
- **Access code API for PoS and PMS applications**
- **Remote access and configuration**
- **Free Cloud management service**

RV park and campground owners face risks by offering an open WiFi Hotspot. Risks vary from getting the business computers and PoS hacked, to getting sued for illegal downloading of copyrighted files.

Many RV parks and campgrounds already offer some type of Internet service for guests and visitors. Visitors consider an Internet WiFi Hotspot to be an essential amenity. The WiFi Hotspot might be single wireless access point at the office or a large wireless network that covers the whole area of the RV Park or campground and has roaming between antennas to the user is never disconnected when moving through the area.

Guest Internet Hotspot gateways have a firewall that is PCI compliant and protects your business computers and PoS from hackers.

Another important feature is the P2P blocker that prevents guests sharing copyrighted files, ensuring that the RV park or campground owner is free from potential lawsuits.

Use the gateway credit card billing feature to provide free regulated access and charge for the high-speed service using the PayPal® credit card processing service.
